

For 40 years, we have been developing,
manufacturing, and applying high-performance
coatings for spacecrafts.

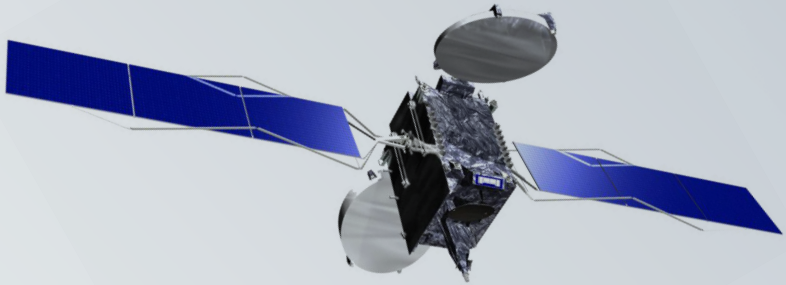

MAP

SPACE COATINGS

01

Securing your space mission

01 Black thermal and optical control coatings

Conductive, Antistatic
Insulant, Bonding primer

02 White thermal control coatings

Conductive, Antistatic, Insulant

03 Grey thermal control coating

Conductive

04 Adhesives

Electrically conductive, Thermally
conductive, Insulant

05 Electronic boards protections

06 Atomic oxygen protections

07 Lubricants

Long-lasting, Wide-range temperature

Our key differentiators

40 years flight heritage
and know-how.

Coatings developed, manufactured
and applied at our own factory.

Ensuring successful launches

01 **White thermal control coatings**

Antistatic

02 **High temperature protection**

Insulant

03 **Silver electromagnetic control coating**

Conductive

**The right product
on the right place.**

Coatings application service on spacecraft pieces
(over 100,000 pieces coated since 1986).

**French space agency certified
qualifications.**

**Multiple substrates qualified with
our paint systems.**

To face an extreme environment, you need a trustworthy supply and business partner.

50%
worldwide turnover

70%
products

30%
application service
